Fractal Microstrip Antenna Design, Fabrication and Measurements: Fractal Microstrip Antennas

Mohamed I. Ahmed

The two main properties of the fractal antennas were investigated. Firstly, the self-similarity property was studied. The cavity model is used to analyze an equilateral triangular patch on a grounded dielectric substrate. A Matlab program was built to calculate the resonant frequencies, the input impedance, the reflection coefficient, etc. Then this triangular patch was used as the initiator of the Sierpinski Gasket fractal antenna with probe feeding. The first three iterations of this antenna were studied. These novel shapes include an air gap between the substrate and the ground plane, inverting the patch to reduce the dielectric loss and consequently increase the antenna efficiency and adding a shorting pin to improve the matching conditions as well as reducing the antenna size. Secondly, the space-filling property was studied and the rectangular microstrip patch was used as an initiator to all iterations. The first three iterations of a single pulse microstrip patch antenna were investigated. The second step was to study other shapes like the two pulses, NRZ (Non Return to Zero), Koch at angles 30o, 60o, 80o and 90o, Pulse 2.45 and Pulse 2.45 + Koch 90o microstrip antennas.

From reader reviews:

Alice Smith:

Do you have favorite book? In case you have, what is your favorite's book? Publication is very important thing for us to know everything in the world. Each guide has different aim or maybe goal; it means that guide has different type. Some people feel enjoy to spend their the perfect time to read a book. They may be reading whatever they take because their hobby is reading a book. What about the person who don't like reading a book? Sometime, man feel need book if they found difficult problem as well as exercise. Well, probably you will need this Fractal Microstrip Antenna Design, Fabrication and Measurements: Fractal Microstrip Antennas.

Phillip Herzog:

Have you spare time for a day? What do you do when you have much more or little spare time? Yes, you can choose the suitable activity regarding spend your time. Any person spent all their spare time to take a go walking, shopping, or went to often the Mall. How about open or even read a book entitled Fractal Microstrip Antenna Design, Fabrication and Measurements: Fractal Microstrip Antennas? Maybe it is for being best activity for you. You already know beside you can spend your time with the favorite's book, you can cleverer than before. Do you agree with it has the opinion or you have additional opinion?

Virginia Higgins:

A lot of people always spent all their free time to vacation or maybe go to the outside with them loved ones or their friend. Did you know? Many a lot of people spent they free time just watching TV, or perhaps playing video games all day long. If you need to try to find a new activity that is look different you can read a book. It is really fun for you. If you enjoy the book you read you can spent 24 hours a day to reading a publication. The book Fractal Microstrip Antenna Design, Fabrication and Measurements: Fractal Microstrip Antennas it is very good to read. There are a lot of those who recommended this book. They were enjoying reading this book. In the event you did not have enough space to develop this book you can buy the e-book. You can m0ore easily to read this book from a smart phone. The price is not very costly but this book features high quality.

Judy Newberry:

Your reading sixth sense will not betray anyone, why because this Fractal Microstrip Antenna Design, Fabrication and Measurements: Fractal Microstrip Antennas publication written by well-known writer whose to say well how to make book which might be understand by anyone who also read the book. Written in good manner for you, dripping every ideas and creating skill only for eliminate your hunger then you still doubt Fractal Microstrip Antenna Design, Fabrication and Measurements: Fractal Microstrip Antennas as good book not just by the cover but also through the content. This is one publication that can break don't judge book by its include, so do you still needing one more sixth sense to pick that!? Oh come on your

reading through sixth sense already said so why you have to listening to an additional sixth sense.
