Make: Electronics: Learning Through Discovery Charles Platt

"This is teaching at its best!"

--Hans Camenzind, inventor of the 555 timer (the world's most successful integrated circuit), and author of *Much Ado About Almost Nothing: Man's Encounter with the Electron* (Booklocker.com)

"A fabulous book: well written, well paced, fun, and informative. I also love the sense of humor. It's very good at disarming the fear. And it's *gorgeous*. I'll be recommending this book highly."

--Tom Igoe, author of *Physical Computing* and *Making Things Talk*

A "magnificent and rewarding book. ... Every step of this structured instruction is expertly illustrated with photos and crisp diagrams. . . . This really is the best way to learn."

--Kevin Kelly, in *Cool Tools*

The first edition of *Make: Electronics* established a new benchmark for introductory texts. This second edition enhances that learning experience.

Here you will find unique, photographically precise diagrams of breadboarded components, to help you build circuits with speed and precision. A new shopping guide and a simplified range of components, will minimize your investment in parts for the projects. A completely new section on the Arduino shows you how to write properly structured programs instead of just downloading other people's code. Projects have been reworked to provide additional features, and the book has been restructured to offer a step-by-step learning process that is as clear and visually pleasing on handheld devices as it is on paper. Full color is used throughout.

As before, *Make: Electronics* begins with the basics. You'll see for yourself how components work--and what happens when they don't. You'll short out a battery and overheat an LED. You'll also open up a potentiometer and a relay to see what's inside. No other book gives you such an opportunity to learn from real-life experiences.

Ultimately, you will build gadgets that have lasting value, and you'll have a complete understanding of how they work. From capacitors to transistors to microcontrollers--it's all here.

Hans Camenzind, inventor of the 555 Timer (the world's most successful integrated circuit chip), said that "This is teaching at its best!" when he reviewed the first edition. Now the second edition offers even more!

From reader reviews:

Lorenzo Brown:

As people who live in the actual modest era should be up-date about what going on or data even knowledge to make these people keep up with the era that is certainly always change and advance. Some of you maybe will update themselves by reading books. It is a good choice for you personally but the problems coming to anyone is you don't know what one you should start with. This Make: Electronics: Learning Through Discovery is our recommendation to help you keep up with the world. Why, as this book serves what you want and want in this era.

Michelle Garrett:

The guide untitled Make: Electronics: Learning Through Discovery is the e-book that recommended to you you just read. You can see the quality of the e-book content that will be shown to a person. The language that creator use to explained their way of doing something is easily to understand. The article author was did a lot of exploration when write the book, hence the information that they share for your requirements is absolutely accurate. You also will get the e-book of Make: Electronics: Learning Through Discovery from the publisher to make you a lot more enjoy free time.

Christopher Arnold:

The book with title Make: Electronics: Learning Through Discovery has lot of information that you can discover it. You can get a lot of gain after read this book. This particular book exist new expertise the information that exist in this reserve represented the condition of the world today. That is important to yo7u to be aware of how the improvement of the world. This particular book will bring you with new era of the glowbal growth. You can read the e-book on your smart phone, so you can read it anywhere you want.

Jerold Niemi:

As a college student exactly feel bored to help reading. If their teacher inquired them to go to the library as well as to make summary for some reserve, they are complained. Just minor students that has reading's heart or real their interest. They just do what the professor want, like asked to go to the library. They go to right now there but nothing reading really. Any students feel that reading through is not important, boring and can't see colorful photographs on there. Yeah, it is for being complicated. Book is very important for yourself. As we know that on this time, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. Therefore this Make: Electronics: Learning Through Discovery can make you feel more interested to read.
