Spatial planning and resilience following disasters: International and comparative perspectives

Spatial planning and resilience following disasters: International and comparative perspectives

Population shifts and an increase in the number of natural (and manmade) disasters are having a profound effect on urban and rural habitats globally. This book brings together for the first time the experiences and knowledge of international contributors from academia, research, policy and practice to discuss the role of spatial planning after significant disasters. It highlights ongoing efforts to improve spatial resilience across the globe and predicts future trends. Comparisons from five countries including Japan, the US, Indonesia, Slovakia and Germany, highlight the influence of significant disasters on spatial planning and spatial resiliency under different legaladministrative and cultural frameworks.
