## **An Assessment of the IMEF Depot-Level Corrosion Prevention and Control Program and the Viability of Making it More Efficient and/or Outsourcing the Requirements through Private Sector Initiatives** Steven J. Mullen

This is a NAVAL POSTGRADUATE SCHOOL MONTEREY CA GRADUATE SCHOOL OF BUSINESS AND PUBLICPOLICY report procured by the Pentagon and made available for public release. It has been reproduced in the best form available to the Pentagon. It is not spiral-bound, but rather assembled with Velobinding in a soft, white linen cover. The Storming Media report number is A871114. The abstract provided by the Pentagon follows: In an era of both downsizing of Defense Eudgets combined with high operational tempo, the military is faced with doing more with less as a way of life. Add to this the overall rise in the average age of the ground tactical and ground support equipment, and both preventative and corrective maintenance takes on added importance. Corrosion Prevention and Control is a necessity in extending the life of our equipment, this is especially true for the Marine Corps, which operates in harsh environments that quickly degrade its gear. While mandated programs at each echelon of maintenance are technically proficient, the Depot-level program, to include transportation, in use by IMEF appears to be inefficient. The objective of this thesis research was to analyze the present program used to meet the Depot-level requirements for the West coast and see if gives the Corps the Best Value available. Best Value in this case considers both the effect on equipment readiness and overall cost. The present program to protect the assets is efficient and mostly cost effective, yet the transportation procedures are inefficient and not cost effective. This unnecessarily degrades readiness for the war fighter. It is proposed that implementing both the use of organic transportation assets and utilizing outsourcing will greatly improve Readiness levels to IMEF% and lower overall program costs.

### **From reader reviews:**

#### **William Jewell:**

Book is written, printed, or created for everything. You can recognize everything you want by a e-book. Book has a different type. As you may know that book is important issue to bring us around the world. Close to that you can your reading skill was fluently. A book An Assessment of the IMEF Depot-Level Corrosion Prevention and Control Program and the Viability of Making it More Efficient and/or Outsourcing the Requirements through Private Sector Initiatives will make you to always be smarter. You can feel considerably more confidence if you can know about everything. But some of you think in which open or reading any book make you bored. It is not make you fun. Why they could be thought like that? Have you looking for best book or appropriate book with you?

#### **Guillermo Behler:**

What do you concentrate on book? It is just for students because they're still students or it for all people in the world, the particular best subject for that? Only you can be answered for that question above. Every person has various personality and hobby for every single other. Don't to be forced someone or something that they don't would like do that. You must know how great and important the book An Assessment of the IMEF Depot-Level Corrosion Prevention and Control Program and the Viability of Making it More Efficient and/or Outsourcing the Requirements through Private Sector Initiatives. All type of book would you see on many sources. You can look for the internet sources or other social media.

#### **Kristen Clifford:**

This An Assessment of the IMEF Depot-Level Corrosion Prevention and Control Program and the Viability of Making it More Efficient and/or Outsourcing the Requirements through Private Sector Initiatives is brand new way for you who has fascination to look for some information because it relief your hunger of knowledge. Getting deeper you on it getting knowledge more you know or else you who still having small amount of digest in reading this An Assessment of the IMEF Depot-Level Corrosion Prevention and Control Program and the Viability of Making it More Efficient and/or Outsourcing the Requirements through Private Sector Initiatives can be the light food for yourself because the information inside this book is easy to get by means of anyone. These books develop itself in the form that is certainly reachable by anyone, yep I mean in the e-book web form. People who think that in e-book form make them feel sleepy even dizzy this guide is the answer. So there isn't any in reading a guide especially this one. You can find actually looking for. It should be here for anyone. So , don't miss the item! Just read this e-book sort for your better life in addition to knowledge.

#### **Joseph Gabriel:**

Don't be worry for anyone who is afraid that this book can filled the space in your house, you can have it in

e-book way, more simple and reachable. This kind of An Assessment of the IMEF Depot-Level Corrosion Prevention and Control Program and the Viability of Making it More Efficient and/or Outsourcing the Requirements through Private Sector Initiatives can give you a lot of good friends because by you considering this one book you have thing that they don't and make you actually more like an interesting person. This particular book can be one of a step for you to get success. This book offer you information that probably your friend doesn't understand, by knowing more than different make you to be great individuals. So , why hesitate? Let's have An Assessment of the IMEF Depot-Level Corrosion Prevention and Control Program and the Viability of Making it More Efficient and/or Outsourcing the Requirements through Private Sector Initiatives.
