Physics of the Human Body (Biological and Medical Physics, Biomedical Engineering) Irving P. Herman

This book comprehensively addresses the physics and engineering aspects of human physiology by using and building on first-year college physics and mathematics. Topics include the mechanics of the static body and the body in motion, the mechanical properties of the body, muscles in the body, the energetics of body metabolism, fluid flow in the cardiovascular and respiratory systems, the acoustics of sound waves in speaking and hearing, vision and the optics of the eye, the electrical properties of the body, and the basic engineering principles of feedback and control in regulating all aspects of function. The goal of this text is to clearly explain the physics issues concerning the human body, in part by developing and then using simple and subsequently more refined models of the macrophysics of the human body. Many chapters include a brief review of the underlying physics. There are problems at the end of each chapter; solutions to selected problems are also provided. This second edition enhances the treatments of the physics of motion, sports, and diseases and disorders, and integrates discussions of these topics as they appear throughout the book. Also, it briefly addresses physical measurements of and in the body, and offers a broader selection of problems, which, as in the first edition, are geared to a range of student levels. This text is geared to undergraduates interested in physics, medical applications of physics, quantitative physiology, medicine, and biomedical engineering.

From reader reviews:

Linda King:

Reading a reserve can be one of a lot of action that everyone in the world likes. Do you like reading book and so. There are a lot of reasons why people enjoy it. First reading a guide will give you a lot of new facts. When you read a e-book you will get new information mainly because book is one of several ways to share the information as well as their idea. Second, looking at a book will make you more imaginative. When you reading through a book especially tale fantasy book the author will bring one to imagine the story how the characters do it anything. Third, you can share your knowledge to other individuals. When you read this Physics of the Human Body (Biological and Medical Physics, Biomedical Engineering), you can tells your family, friends as well as soon about yours book. Your knowledge can inspire the mediocre, make them reading a reserve.

Billie Sneed:

This Physics of the Human Body (Biological and Medical Physics, Biomedical Engineering) is great publication for you because the content that is certainly full of information for you who always deal with world and still have to make decision every minute. That book reveal it details accurately using great manage word or we can state no rambling sentences within it. So if you are read the idea hurriedly you can have whole information in it. Doesn't mean it only provides you with straight forward sentences but tough core information with beautiful delivering sentences. Having Physics of the Human Body (Biological and Medical Physics, Biomedical Engineering) in your hand like finding the world in your arm, facts in it is not ridiculous one. We can say that no guide that offer you world within ten or fifteen moment right but this publication already do that. So , this can be good reading book. Hello Mr. and Mrs. active do you still doubt which?

Flora Godfrey:

Is it anyone who having spare time and then spend it whole day by watching television programs or just lying down on the bed? Do you need something new? This Physics of the Human Body (Biological and Medical Physics, Biomedical Engineering) can be the respond to, oh how comes? A fresh book you know. You are consequently out of date, spending your free time by reading in this brand new era is common not a geek activity. So what these publications have than the others?

James Baker:

Do you like reading a reserve? Confuse to looking for your favorite book? Or your book was rare? Why so many query for the book? But any people feel that they enjoy for reading. Some people likes studying, not only science book but in addition novel and Physics of the Human Body (Biological and Medical Physics, Biomedical Engineering) or maybe others sources were given knowledge for you. After you know how the fantastic a book, you feel want to read more and more. Science e-book was created for teacher as well as

students especially. Those ebooks are helping them to add their knowledge. In different case, beside science e-book, any other book likes Physics of the Human Body (Biological and Medical Physics, Biomedical Engineering) to make your spare time more colorful. Many types of book like here.
