ArcGIS for JavaScript developers by Example

Jayakrishnan Vijayaraghavan, Yogesh Dhanapal

ArcGIS for JavaScript developers by Example Jayakrishnan Vijayaraghavan, Yogesh Dhanapal

Key Features

- Unshackle your GIS application from a workstation! Get running with three major web mapping projects covering all the important aspects of the ArcGIS JavaScript API.
- Set a strong foundation for the ArcGIS JavaScript API and modular coding with dojo.
- Gain a crystal clear understanding of the ArcGIS JavaScript, and become skilled in creating exciting and interesting geospatial apps.

Book Description

The book starts by explaining the basics of the ArcGIS web mapping ecosystem. The book walks you through the development of six major applications, covering a wide variety of topics such as querying, rendering, advanced data visualization and performing map analytics. It also emphasizes on writing modular code using pure dojo, which is the preferred platform for developing web GIS applications using ArcGIS JavaScript API.

By the end of the book, you will have gained enough practical experience to architect a robust and visually powerful mapping application using the API.

What you will learn

- Find out what you need to develop a web mapping application in the ArcGIS environment
- Get to know about the major features provided by the ArcGIS JavaScript API
- See the coding best practices to develop modular dojo-based JavaScript applications
- Get to grips with writing custom re-usable dojo modules using dojo and esri modules and dijits
- Understand how to use various ArcGIS data sources and other open geospatial data available on the web
- Discover how to query spatial data and get the best out of your data using analytical techniques
- Master the art of rendering your map beautifully and create wonderful data visualizations using non-map objects such as charts
- Grasp how to create secure and scalable web maps

About the Author

Jayakrishnan Vijayaraghavan is an Esri-certified web developer with extensive experience in full stack web development, machine learning, and GIS. Working in variegated domains and geographies and through graduate and undergraduate studies in computer science and GIS, he has gained a solid grounding in geospatial technologies and in data science. He is a DAAD scholar and a winner of the UN-HABITAT special jury award. He's keen on developing intelligent and ubiquitous mapping systems by integrating Machine Learning concepts with GIS. He is also a novelist and poet too.

Yogesh Dhanapal has expertise in developing and delivering end-to-end web mapping application for key clients, and he is proficient in many web technologies. He also has many years of training and education in the geospatial domain. A hardcore programmer and GIS enthusiast, Yogesh is a Microsoft-certified solutions developer?web applications and Esri-certified web developer. He has gained expertise in applying GIS for

transportation and petroleum domain and has extensive experience in customizing Esri roads and highways extension with JavaScript dojo modules. He is keen on developing cross-platform and web applications with a mobile-first approach.

Table of Contents

1. Foundation for the API
2. Layers and Widgets
3. Writing Queries
4. Building Custom Widgets
5. Working with Renderers
6. Working with Real-Time Data
7. Map Analytics and Visualization Techniques
8. Advanced Map Visualization and Charting Libraries
9. Visualization with Time Aware Layers

From reader reviews:

Ramona Johnson:

Why don't make it to become your habit? Right now, try to prepare your time to do the important action, like looking for your favorite reserve and reading a reserve. Beside you can solve your long lasting problem; you can add your knowledge by the reserve entitled ArcGIS for JavaScript developers by Example. Try to make book ArcGIS for JavaScript developers by Example as your buddy. It means that it can to get your friend when you truly feel alone and beside regarding course make you smarter than ever before. Yeah, it is very fortunated in your case. The book makes you more confidence because you can know every thing by the book. So , let me make new experience in addition to knowledge with this book.

Edward Emory:

As people who live in the actual modest era should be change about what going on or information even knowledge to make these people keep up with the era which can be always change and progress. Some of you maybe can update themselves by examining books. It is a good choice for you but the problems coming to you actually is you don't know what kind you should start with. This ArcGIS for JavaScript developers by Example is our recommendation to cause you to keep up with the world. Why, because book serves what you want and need in this era.

Irene Holmes:

Is it anyone who having spare time in that case spend it whole day by means of watching television programs or just lying down on the bed? Do you need something totally new? This ArcGIS for JavaScript developers by Example can be the answer, oh how comes? The new book you know. You are and so out of date, spending your time by reading in this brand new era is common not a geek activity. So what these textbooks have than the others?

Sarah McClain:

As we know that book is very important thing to add our knowledge for everything. By a book we can know everything we would like. A book is a range of written, printed, illustrated or blank sheet. Every year was exactly added. This e-book ArcGIS for JavaScript developers by Example was filled in relation to science. Spend your free time to add your knowledge about your scientific disciplines competence. Some people has distinct feel when they reading the book. If you know how big good thing about a book, you can really feel enjoy to read a publication. In the modern era like right now, many ways to get book that you simply wanted.
