Illustrations of Quarantine Pests for Europe I M Smith, A S Roy

This book is a companion volume to *Quarantine Pests for Europe*, published originally in 1992 by the European and Mediterranean Plant Protection Organization (EPPO) and CAB INTERNATIONAL (CABI) for the European Union. The previous book provides information on identity, hosts, geographical distribution, biology, detection and identification, means of movement and dispersal, pest significance, phytosanitary measures and a bibliography for all the quarantine pests listed by EPPO and the European Union, but does not contain any illustrations.

A second edition of *Quarantine Pests for Europe* will be published at the end of 1996. The present book contains approximately 400 color illustrations, most of them new in relation to the very first illustrations of the EPPO Data Sheets which appeared in *Bulletin OEPP/EPPO Bulletin* in the 1980s. The book covers most of the quarantine pests listed by EPPO and the European Union, including those which have been added to the quarantine lists since 1992. Thus it will be compatible with the second edition of the volume of text data sheets. The quarantine pests concerned are either not present in the Euro-Mediterranean region, or only present to a limited extent and submitted to official control measures.

The sequence of presentation is as for the text volume, (i.e. insects, nematodes, fungi, bacteria, viruses, parasitic plants). Within each chapter, the pest illustrations appear in alphabetical order. An index including scientific names and synonyms is included at the end of the book. Accompanying text is presented in both English and French. Although it has not been possible to illustrate every listed quarantine pest, this book provides a unique collection that will help phytosanitary inspectors, plant health officers, and others working in the field of plant quarantine, or plant protection in general, to recognize and identify quarantine pests. The book is published by EPPO in association with CABI, and is available for sale exclusively through CABI.

Donna Cancel:

Reading can called brain hangout, why? Because while you are reading a book particularly book entitled Illustrations of Quarantine Pests for Europe your thoughts will drift away trough every dimension, wandering in every aspect that maybe unfamiliar for but surely might be your mind friends. Imaging just about every word written in a e-book then become one form conclusion and explanation in which maybe you never get ahead of. The Illustrations of Quarantine Pests for Europe giving you one more experience more than blown away your thoughts but also giving you useful information for your better life in this era. So now let us present to you the relaxing pattern at this point is your body and mind are going to be pleased when you are finished reading it, like winning a sport. Do you want to try this extraordinary spending spare time activity?

Robert Heck:

As a student exactly feel bored to reading. If their teacher requested them to go to the library or to make summary for some reserve, they are complained. Just little students that has reading's internal or real their passion. They just do what the teacher want, like asked to go to the library. They go to presently there but nothing reading really. Any students feel that examining is not important, boring as well as can't see colorful images on there. Yeah, it is to be complicated. Book is very important for you. As we know that on this era, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. Therefore this Illustrations of Quarantine Pests for Europe can make you sense more interested to read.

Katie McCants:

What is your hobby? Have you heard that will question when you got pupils? We believe that that question was given by teacher to the students. Many kinds of hobby, All people has different hobby. Therefore you know that little person including reading or as reading through become their hobby. You need to understand that reading is very important along with book as to be the thing. Book is important thing to include you knowledge, except your own teacher or lecturer. You see good news or update concerning something by book. A substantial number of sorts of books that can you take to be your object. One of them is Illustrations of Quarantine Pests for Europe.
