Security and Embedded Systems: Volume 2 NATO Security through Science Series: Information and Communication Security R. Giladi D.N. Serpanos

Technological advances have led to wide deployment and use of embedded systems in an increasing range of applications, from mobile phones to car, plane and spacecraft and from digital ids to military systems in the field. Many of these applications place significant security requirements and have led to significant research activity in the area of security and embedded systems, due to the limited resources of conventional embedded systems. This emerging research area is of great importance to a large number of public and private organizations, due to their desire to deploy secure embedded systems in the field. This publication brings together one of the first international efforts to emphasize the importance of this emerging technical field and provides presentations of leading researchers in the field. Its objectives are to present the technologies and open problems of the emerging area of security and embedded systems, to present the latest research results in all aspects of security in embedded systems, and, finally, to provide a roadmap of the technology for the future. Considering the main directions of research in the field, three main areas are discussed: (i) foundations of security and embedded systems, (ii) secure embedded computing systems and (iii) telecommunications and network services.

IOS Press is an international science, technical and medical publisher of high-quality books for academics, scientists, and professionals in all fields.

Some of the areas we publish in:

- Biomedicine
- Oncology
- Artificial intelligence
- Databases and information systems
- Maritime engineering
- Nanotechnology
- Geoengineering
- All aspects of physics
- E-governance
- E-commerce
- The knowledge economy
- Urban studies
- Arms control
- Understanding and responding to terrorism
- Medical informatics
- Computer Sciences

From reader reviews:

Kathryn Sheffield:

Information is provisions for anyone to get better life, information presently can get by anyone on everywhere. The information can be a understanding or any news even an issue. What people must be consider whenever those information which is from the former life are hard to be find than now could be taking seriously which one would work to believe or which one typically the resource are convinced. If you receive the unstable resource then you understand it as your main information there will be huge disadvantage for you. All of those possibilities will not happen inside you if you take Security and Embedded Systems: Volume 2 NATO Security through Science Series: Information and Communication Security as your daily resource information.

Melvin Wilhelm:

Reading a publication tends to be new life style in this particular era globalization. With studying you can get a lot of information which will give you benefit in your life. Together with book everyone in this world can certainly share their idea. Books can also inspire a lot of people. A lot of author can inspire their reader with their story or even their experience. Not only situation that share in the guides. But also they write about the knowledge about something that you need example. How to get the good score toefl, or how to teach your young ones, there are many kinds of book that exist now. The authors these days always try to improve their ability in writing, they also doing some investigation before they write with their book. One of them is this Security and Embedded Systems: Volume 2 NATO Security through Science Series: Information and Communication Security.

Glen Thomas:

Is it you actually who having spare time in that case spend it whole day by simply watching television programs or just resting on the bed? Do you need something new? This Security and Embedded Systems: Volume 2 NATO Security through Science Series: Information and Communication Security can be the reply, oh how comes? The new book you know. You are and so out of date, spending your spare time by reading in this new era is common not a nerd activity. So what these publications have than the others?

Jewel Williams:

Many people said that they feel uninterested when they reading a publication. They are directly felt the item when they get a half areas of the book. You can choose the particular book Security and Embedded Systems: Volume 2 NATO Security through Science Series: Information and Communication Security to make your current reading is interesting. Your personal skill of reading proficiency is developing when you like reading. Try to choose simple book to make you enjoy you just read it and mingle the sensation about book and reading especially. It is to be initially opinion for you to like to open up a book and read it. Beside that the book Security and Embedded Systems: Volume 2 NATO Security through Science Series: Information and

Communication Security can to be your brand-new friend when you're truly feel alone and confuse using what must you're doing of this time.
