Troubleshooting Linux Firewalls

Michael Shinn, Scott Shinn

Troubleshooting Linux Firewalls Michael Shinn, Scott Shinn

While Linux firewalls are inexpensive and quite reliable, they lack the support component of their commercial counterparts. As a result, most users of Linux firewalls have to resort to mailing lists to solve their problems. Our authors have scoured firewall mailing lists and have compiled a list of the most often encountered problems in Linux firewalling. This book takes a Chilton's manual diagnostic approach to solving these problems. The book begins by presenting the two most common Linux firewall configurations and demonstrates how to implement these configurations in an imperfect network environment, not in an ideal one. Then, the authors proceed to present a methodology for analyzing each problem at various network levels: cabling, hardware components, protocols, services, and applications. The authors include diagnostic scripts which the readers can use to analyze and solve their particular Linux firewall problems. The reference distributions are Red Hat and SuSE (for international market).
