Help readers learn to think like nurses and visualize how to care for children

To prepare today's students to begin thinking and acting like nurses, *Principles of Pediatric Nursing*, Seventh Edition presents a foundation of core pediatric nursing principles with an emphasis on growth and development, family-centered care, and health promotion and maintenance. Nursing students often bring an Adult Health mindset to Pediatric Nursing, which can obscure the special considerations needed to effectively care for children. *Principles of Pediatric Nursing* helps students visualize how to care for children and understand the ways caring for pediatric patients is similar to, and different from, adult patients.

Also available with MyNursingLab

MyNursingLab is an online self-study and class preparation program designed to engage students and improve results. Its personalized learning path helps students think like nurses as they move beyond memorization to true understanding through application.
