Augmented Reality using Appcelerator Titanium Starter Trevor Ward

Learn to create Augmented Reality applications in no time using the Appcelerator Titanium Framework

- Create an open source Augmented Reality Titanium application
- Build an effective display of multiple points of interest.
- Learn to calculate distances between points of interest.
- Understand how to effectively and cleanly move the points of interest as the device rotates

In Detail

Titanium Mobile has quickly become the platform of choice for many mobile developers and is growing and changing at a rapid rate. From the implementation of CommonJS, Cloud Services, MVC design patterns and more, the last year in Titanium development has been a roller coaster of change for the better. Augmented Reality is a hot area for mobile applications and this book along with the augmentedTi open source application will give a great start to all augmented applications..

This book will show you how to build an Augmented Reality application, which is clean, efficient and usable. It shows how to hide the processing from the user and build a display which updates and rotates smoothly.

Mobile devices have got more powerful, but they still have limitations. Augmented Reality applications test these devices to breaking point and without the correct coding techniques make the applications unresponsive and cumbersome.

This book gives a solution, which will enable you to build an effective application, and is accompanied by a complete working application and source code. It's essential for anybody who is creating a multiple points of interest augmented reality application. It shows how to build this type of application efficiently and takes into consideration the devices limitations and processing capabilities

What you will learn from this book

- Getting current location of devices
- Obtaining and displaying the data relevant to the current location
- Calculating the distance between two points
- Scaling images based on distance
- Titanium common JS application architecture
- Handling device processing limitations
- Understanding the pitfalls in developing Augmented Reality applications

Approach

It's a quick start tutorial to help you get started with creating Augmented Reality applications and acquainting yourself with essential aspects of creating AR applications using the Appcelerator Titanium Framework. The instructions are clear with easy to follow examples.

Who this book is written for

This book is for anybody who wishes to understand how to build an Augmented Reality Application. It uses the Appcelerator Titanium mobile development framework, but the techniques and practices can be applied to other frameworks and native code.

You will need to have a good working knowledge of development and JavaScript, it is not aimed at the beginner.

From reader reviews:

Rocio Linville:

Book is written, printed, or illustrated for everything. You can learn everything you want by a publication. Book has a different type. As we know that book is important point to bring us around the world. Next to that you can your reading skill was fluently. A e-book Augmented Reality using Appcelerator Titanium Starter will make you to always be smarter. You can feel much more confidence if you can know about every little thing. But some of you think this open or reading a book make you bored. It is not necessarily make you fun. Why they may be thought like that? Have you trying to find best book or acceptable book with you?

Roberta Granger:

Do you one among people who can't read enjoyable if the sentence chained inside straightway, hold on guys this specific aren't like that. This Augmented Reality using Appcelerator Titanium Starter book is readable by you who hate the straight word style. You will find the info here are arrange for enjoyable studying experience without leaving possibly decrease the knowledge that want to offer to you. The writer of Augmented Reality using Appcelerator Titanium Starter content conveys the idea easily to understand by a lot of people. The printed and e-book are not different in the content but it just different such as it. So , do you continue to thinking Augmented Reality using Appcelerator Titanium Starter is not loveable to be your top listing reading book?

Jere Bingham:

Information is provisions for people to get better life, information nowadays can get by anyone in everywhere. The information can be a understanding or any news even an issue. What people must be consider while those information which is within the former life are challenging be find than now's taking seriously which one is acceptable to believe or which one the particular resource are convinced. If you have the unstable resource then you buy it as your main information you will see huge disadvantage for you. All of those possibilities will not happen inside you if you take Augmented Reality using Appcelerator Titanium Starter as your daily resource information.

Marianne Button:

A lot of guide has printed but it is unique. You can get it by internet on social media. You can choose the most beneficial book for you, science, amusing, novel, or whatever simply by searching from it. It is identified as of book Augmented Reality using Appcelerator Titanium Starter. You can include your knowledge by it. Without making the printed book, it can add your knowledge and make an individual happier to read. It is most critical that, you must aware about publication. It can bring you from one location to other place.
