Food, Farming, and Hunting (American Indian Contributions to the World) Emory Dean Keoke, Kay Marie Porterfield

By the time European conquistadores and colonizers arrived in the Americas, starting in 1492, American Indians had already invented sophisticated hunting and fishing technology. They gathered hundreds of plants for food, fiber, and medicine, and first domesticated three-quarters of the food crops raised in the world today. Food, Farming, and Hunting covers the many contributions that American Indians have made throughout history, including the various tools used in hunting, such as bolas, bows and arrows, and camouflage, and the different methods of fishing for each culture. The volume identifies the many foods North American, Mesoamerican, and South American Indians gathered, discusses the birth of agriculture in the Americas, and describes the plants that were eventually domesticated and farmed. Later developments and improvements in farming, such as irrigation and the use of fertilizer, are also covered.

From reader reviews:

Sheila Gallagher:

In this 21st hundred years, people become competitive in each and every way. By being competitive today, people have do something to make these individuals survives, being in the middle of the actual crowded place and notice by means of surrounding. One thing that often many people have underestimated this for a while is reading. Sure, by reading a guide your ability to survive increase then having chance to endure than other is high. In your case who want to start reading the book, we give you this kind of Food, Farming, and Hunting (American Indian Contributions to the World) book as starter and daily reading e-book. Why, because this book is usually more than just a book.

Mildred Bostwick:

People live in this new moment of lifestyle always make an effort to and must have the extra time or they will get wide range of stress from both lifestyle and work. So , whenever we ask do people have free time, we will say absolutely indeed. People is human not really a robot. Then we request again, what kind of activity have you got when the spare time coming to a person of course your answer will probably unlimited right. Then do you ever try this one, reading publications. It can be your alternative throughout spending your spare time, typically the book you have read is actually Food, Farming, and Hunting (American Indian Contributions to the World).

Roger Everman:

Your reading sixth sense will not betray you, why because this Food, Farming, and Hunting (American Indian Contributions to the World) reserve written by well-known writer we are excited for well how to make book which might be understand by anyone who also read the book. Written throughout good manner for you, dripping every ideas and writing skill only for eliminate your own personal hunger then you still skepticism Food, Farming, and Hunting (American Indian Contributions to the World) as good book not simply by the cover but also with the content. This is one publication that can break don't evaluate book by its protect, so do you still needing one more sixth sense to pick this specific!?! Oh come on your reading sixth sense already alerted you so why you have to listening to one more sixth sense.

Michelle Morrow:

What is your hobby? Have you heard that question when you got scholars? We believe that that question was given by teacher to their students. Many kinds of hobby, Everybody has different hobby. And you also know that little person similar to reading or as reading through become their hobby. You need to understand that reading is very important in addition to book as to be the matter. Book is important thing to provide you knowledge, except your own personal teacher or lecturer. You get good news or update in relation to something by book. Different categories of books that can you go onto be your object. One of them are these claims Food, Farming, and Hunting (American Indian Contributions to the World).
