Homelessness in the United States: Volume I: State Surveys (Bio-Bibliographies in Music)

Homelessness in the United States: Volume I: State Surveys (Bio-Bibliographies in Music)

Chapters in this work describe and analyze homelessness in 15 states, from all geographic regions of the US. The diversity of survey locations reveals a variety of forces contributing to homelessness. There are frequent efforts to situate the problem within the sociopolitical context of the 1980s. An occasional chapter contains rich theoretical commentary. . . . the scope of the findings is compelling and the contradiction of stereotypes is effective. *Choice*

This volume reads and holds together well even though each of the 14 chapters was written by a different individual or group, covers a different section of the country, uses different types of data sources and analytical methods, and evidences differing perspectives. An excellent foreword and introduction (Bruce Wiegand, Howard M. Bahr) put everything in context . . .

Library Journal

The essays in this volume attempt to answer some of the basic questions involved in the study of homelessness. They address such issues as the nature and extent of homelessness in the United States, the socioeconomic and demographic features of the homeless population, and how homelessness is conceptualized. Other examined matters include family background, duration of homelessness, shelter and social needs, socioeconomic causes, and the demands of the homeless issue on national policy.

This work provides a unique sociological and demographic perspective on the problems of homelessness. Its emphasis on local and state-level studies will make it invaluable for civic groups and policy makers. It will also interest scholars in the fields of housing, urban sociology, and social problems.
