The exhibit is made up of 80 rotatable triangular modules, each one telling an engineering story with a brief overview, a strong central image and a patent drawing or illustration, covering nine major domains of engineering.

The size and scope of the exhibit makes it an experience that can be visited many times, with each visit inspiring something new. *Engineering the Everyday and the Extraordinary* invites us to rediscover the remarkable -- the engineers and inventions that have shaped our world as well as the extraordinary breakthroughs that are already setting the stage for the future.
