Security in Wireless Ad Hoc and Sensor Networks

Erdal Cayirci, Chunming Rong

Security in Wireless Ad Hoc and Sensor Networks Erdal Cayirci, Chunming Rong

This book provides an in-depth guide to security in wireless ad hoc and sensor networks

Security in Wireless Ad Hoc and Sensor Networks introduces the reader to the fundamentals and key issues related to wireless ad hoc networking, with an emphasis on security. It discusses the security attacks and counter measures in wireless ad hoc, sensor and mesh networks, and briefly presents the standards on related topics. The authors offer a clear exposition of various challenges and solutions in this field including bootstrapping, key distribution and exchange, authentication issues, privacy, anonymity and tamper resilience.

Key Features:

- Introduces the fundamentals and key issues of the new technologies followed by comprehensive presentation on security attacks and counter measures
- Covers Denial of Service (DoS) attacks, hardware aspects of secure wireless ad hoc and sensor networks and secure routing
- Contains information on cryptographic primitives and electronic warfare
- Includes problems at the end of each chapter to enhance learning.

This book is well suited for graduate students in computer, electrical and communications engineering and computer science departments, researchers in academia and industry, as well as C4I engineers and officers in the military. Wireless network designers for internet service providers and mobile communications operators will also find this book very useful.

From reader reviews:

Asia Haynes:

A lot of people always spent their particular free time to vacation or maybe go to the outside with them family members or their friend. Were you aware? Many a lot of people spent their free time just watching TV, or maybe playing video games all day long. If you would like try to find a new activity here is look different you can read the book. It is really fun for you. If you enjoy the book that you simply read you can spend 24 hours a day to reading a reserve. The book Security in Wireless Ad Hoc and Sensor Networks it doesn't matter what good to read. There are a lot of people who recommended this book. These folks were enjoying reading this book. In the event you did not have enough space to deliver this book you can buy typically the e-book. You can more effortlessly to read this book from your smart phone. The price is not to cover but this book has high quality.

Mary Wing:

Precisely why? Because this Security in Wireless Ad Hoc and Sensor Networks is an unordinary book that the inside of the publication waiting for you to snap this but latter it will shock you with the secret it inside. Reading this book close to it was fantastic author who all write the book in such remarkable way makes the content inside of easier to understand, entertaining means but still convey the meaning thoroughly. So , it is good for you because of not hesitating having this any more or you going to regret it. This excellent book will give you a lot of rewards than the other book include such as help improving your expertise and your critical thinking technique. So , still want to hesitate having that book? If I have been you I will go to the book store hurriedly.

Debbie Clark:

Does one one of the book lovers? If so, do you ever feeling doubt while you are in the book store? Make an effort to pick one book that you never know the inside because don't determine book by its handle may doesn't work is difficult job because you are frightened that the inside maybe not while fantastic as in the outside look likes. Maybe you answer may be Security in Wireless Ad Hoc and Sensor Networks why because the excellent cover that make you consider concerning the content will not disappoint you. The inside or content will be fantastic as the outside or maybe cover. Your reading sixth sense will directly make suggestions to pick up this book.

William Kavanaugh:

What is your hobby? Have you heard that question when you got scholars? We believe that that problem was given by teacher with their students. Many kinds of hobby, Everyone has different hobby. Therefore you know that little person including reading or as looking at become their hobby. You must know that reading is very important and also book as to be the factor. Book is important thing to add you knowledge, except your personal teacher or lecturer. You will find good news or update in relation to something by book. Numerous

books that can you choose to adopt be your object. One of them are these claims Security in Wireless Ad Hoc and Sensor Networks.
