Bridge of Vocabulary : Evidence-Based Activities for Academic Success

Judy K. Montgomery

Bridge of Vocabulary : Evidence-Based Activities for Academic Success Judy K. Montgomery

The Bridge of Vocabulary is unique and easy to use. It contains 101 vocabulary instruction, enrichment & intervention activities in print form, with an additional 300 guided practice activities & independent practice worksheets on attached CD-ROM. Student sheets, picture cards & word cards provided on CD-ROM give students visual reinforcement for words learned. Level of activities ranges from preschool-high school/young adult, as indicated on purple tabs at edge of each activity pg. Preschoolers interact with pictures to learn early vocabulary concepts such as categorization & classification; elementary students complete both oral & written activities; older students experience abstract vocabulary concepts thru guided discourse & verbal interaction. Materials were designed for simultaneous use by general education classroom teachers & special educators, primarily speech-language pathologists. Each activity contains an Evidence Base statement, a short statement indicating how research informs the practice described in the activity. Two prominent federal education laws require educators & specialists to use "scientifically based research" (No Child Left Behind Act 2001) or "evidence-based interventions to the extent possible" (Individuals with Disabilities Education Improvement Act 2004). The Evidence Base statement gives teachers & interventionists a shortcut to the research. Each activity also includes a Standards Link showing how activity relates to a specific state English Language Arts standard or standards-based curriculum framework. All 50 states, as well as Dist of Columbia, are represented in Standards Links.
