Floods: From Risk to Opportunity (International Association of Hydrological Sciences (IAHS) Red Book Series) Ali Chavoshian, Kuniyoshi Takeuchi

The number of people exposed to devastating floods is expected to rise as the frequency of floods increases due to urbanization and population growth in flood-prone areas, land-use changes, climate change and sea level rise. A paradigm shift from focusing on emergency response and recovery to flood risk management is required to build the capacity necessary to cope with floods.

The process should be supported by vulnerability monitoring and development of tools such as standard measures of risk and preparedness in an integrated approach to improve capacity to deal with floods, taking advantage of their benefits while minimizing their social, economic and environmental risks.

This volume of papers selected from ICFM5 and by international authors, covers flood risk management, disaster management, forecasting and early warning, and management in different regions, and includes the ICFM5 statement.

The International Association of Hydrological Sciences is the world's premier member-based organization promoting the study and practice of Hydrology. Our books are authored, edited and produced at the highest level of quality, with the most current and thorough research.

Our publications and our work advance the science and the professional practice of Hydrology in a variety of Science and Engineering fields around the world.

The areas that we publish in include:

- Ground water
- Surface water
- Snow and ice hydrology
- Drought and desertification
- Runoff modelling
- Watershed
- Remote sensing
- Water quality
- Water resources and management
- Ecohydrology/hydro-ecology
- Erosion and sediment
- Tracer hydrology

From reader reviews:

Billy Reynolds:

The book Floods: From Risk to Opportunity (International Association of Hydrological Sciences (IAHS) Red Book Series) give you a sense of feeling enjoy for your spare time. You should use to make your capable considerably more increase. Book can to get your best friend when you getting tension or having big problem using your subject. If you can make studying a book Floods: From Risk to Opportunity (International Association of Hydrological Sciences (IAHS) Red Book Series) to become your habit, you can get more advantages, like add your capable, increase your knowledge about several or all subjects. You are able to know everything if you like open up and read a publication Floods: From Risk to Opportunity (International Association of Hydrological Sciences (IAHS) Red Book Series). Kinds of book are several. It means that, science reserve or encyclopedia or others. So , how do you think about this publication?

Debra Davis:

Here thing why this Floods: From Risk to Opportunity (International Association of Hydrological Sciences (IAHS) Red Book Series) are different and trustworthy to be yours. First of all reading through a book is good but it depends in the content of the usb ports which is the content is as delightful as food or not. Floods: From Risk to Opportunity (International Association of Hydrological Sciences (IAHS) Red Book Series) giving you information deeper since different ways, you can find any e-book out there but there is no publication that similar with Floods: From Risk to Opportunity (International Association of Hydrological Sciences (IAHS) Red Book Series). It gives you thrill examining journey, its open up your current eyes about the thing that happened in the world which is probably can be happened around you. It is easy to bring everywhere like in recreation area, café, or even in your method home by train. When you are having difficulties in bringing the branded book maybe the form of Floods: From Risk to Opportunity (International Association of Hydrological Sciences (IAHS) Red Book Series) in e-book can be your choice.

Christine Hughes:

Spent a free the perfect time to be fun activity to try and do! A lot of people spent their spare time with their family, or all their friends. Usually they carrying out activity like watching television, gonna beach, or picnic within the park. They actually doing ditto every week. Do you feel it?
