C. T. C. Wall

Homological Group Theory (London Mathematical Society Lecture Note Series) C. T. C. Wall

In 1977 several eminent mathematicians were invited to Durham to present papers at a short conference on homological and combinatorial techniques in group theory. The lectures, published here, aimed at presenting in a unified way new developments in the area. Group theory is approached from a geometrical viewpoint and much of the material has not previously been published. The various ways in which topological ideas can be used in group theory are also brought together. The volume concludes with an extensive set of problems, ranging from explicit questions demanding detailed calculation to fundamental questions motivating research in the area. These lectures will be of interest mainly to researchers in pure mathematics but will also prove useful in connection with relevant postgraduate courses.

From reader reviews:

Patricia Ables:

Nowadays reading books are more than want or need but also become a life style. This reading habit give you lot of advantages. The huge benefits you got of course the knowledge your information inside the book this improve your knowledge and information. The data you get based on what kind of reserve you read, if you want attract knowledge just go with training books but if you want really feel happy read one having theme for entertaining such as comic or novel. The Homological Group Theory (London Mathematical Society Lecture Note Series) is kind of guide which is giving the reader unforeseen experience.

Douglas Quintanar:

Homological Group Theory (London Mathematical Society Lecture Note Series) can be one of your beginner books that are good idea. We recommend that straight away because this reserve has good vocabulary that can increase your knowledge in vocab, easy to understand, bit entertaining but still delivering the information. The writer giving his/her effort to set every word into satisfaction arrangement in writing Homological Group Theory (London Mathematical Society Lecture Note Series) yet doesn't forget the main position, giving the reader the hottest as well as based confirm resource details that maybe you can be considered one of it. This great information could drawn you into brand-new stage of crucial contemplating.

Marcella Aragon:

Many people spending their period by playing outside together with friends, fun activity with family or just watching TV the entire day. You can have new activity to shell out your whole day by looking at a book. Ugh, ya think reading a book can definitely hard because you have to bring the book everywhere? It alright you can have the e-book, having everywhere you want in your Smartphone. Like Homological Group Theory (London Mathematical Society Lecture Note Series) which is keeping the e-book version. So , try out this book? Let's notice.

Sheri Combs:

What is your hobby? Have you heard that question when you got students? We believe that that query was given by teacher on their students. Many kinds of hobby, Everyone has different hobby. And you know that little person just like reading or as looking at become their hobby. You must know that reading is very important and also book as to be the point. Book is important thing to add you knowledge, except your teacher or lecturer. You get good news or update concerning something by book. A substantial number of sorts of books that can you go onto be your object. One of them is Homological Group Theory (London Mathematical Society Lecture Note Series).
