## **Beyond Reason: Eight Great Problems That Reveal the Limits of Science** A. K. Dewdney

A mind-bending excursion to the limits of science and mathematics

Are some scientific problems insoluble? In *Beyond Reason*, internationally acclaimed math and science author A. K. Dewdney answers this question by examining eight insurmountable mathematical and scientific roadblocks that have stumped thinkers across the centuries, from ancient mathematical conundrums such as "squaring the circle," first attempted by the Pythagoreans, to Gödel's vexing theorem, from perpetual motion to the unpredictable behavior of chaotic systems such as the weather.

A. K. Dewdney, PhD (Ontario, Canada), was the author of *Scientific American's* "Computer Recreations" column for eight years. He has written several critically acclaimed popular math and science books, including *A Mathematical Mystery Tour* (0-471-40734-8); *Yes, We Have No Neutrons* (0-471-29586-8); and *200% of Nothing* (0-471-14574-2).
