Mobile Applications Development with Android: Technologies and Algorithms Meikang Qiu, Wenyun Dai, Keke Gai

Mobile Applications Development with Android: Technologies and Algorithms presents advanced techniques for mobile app development, and addresses recent developments in mobile technologies and wireless networks. The book covers advanced algorithms, embedded systems, novel mobile app architecture, and mobile cloud computing paradigms.

Divided into three sections, the book explores three major dimensions in the current mobile app development domain. The first section describes mobile app design and development skills, including a quick start on using Java to run an Android application on a real phone. It also introduces 2D graphics and UI design, as well as multimedia in Android mobile apps.

The second part of the book delves into advanced mobile app optimization, including an overview of mobile embedded systems and architecture. Data storage in Android, mobile optimization by dynamic programming, and mobile optimization by loop scheduling are also covered. The last section of the book looks at emerging technologies, including mobile cloud computing, advanced techniques using Big Data, and mobile Big Data storage.

About the Authors

Meikang Qiu is an Associate Professor of Computer Science at Pace University, and an adjunct professor at Columbia University. He is an IEEE/ACM Senior Member, as well as Chair of the IEEE STC (Special Technical Community) on Smart Computing. He is an Associate Editor of a dozen of journals including *IEEE Transactions on Computers* and *IEEE Transactions on Cloud Computing*. He has published 320+ peer-reviewed journal/conference papers and won 10+ Best Paper Awards.

Wenyun Dai is pursuing his PhD at Pace University. His research interests include high performance computing, mobile data privacy, resource management optimization, cloud computing, and mobile networking. His paper about mobile app privacy has been published in *IEEE Transactions on Computers*.

Keke Gai is pursuing his PhD at Pace University. He has published over 60 peer-reviewed journal or conference papers, and has received three IEEE Best Paper Awards. His research interests include cloud computing, cyber security, combinatorial optimization, business process modeling, enterprise architecture, and Internet computing.

From reader reviews:

Russell Love:

As people who live in the actual modest era should be change about what going on or information even knowledge to make them keep up with the era and that is always change and advance. Some of you maybe can update themselves by examining books. It is a good choice to suit your needs but the problems coming to an individual is you don't know what type you should start with. This Mobile Applications Development with Android: Technologies and Algorithms is our recommendation so you keep up with the world. Why, because this book serves what you want and wish in this era.

Priscilla McNeil:

Reading can called brain hangout, why? Because if you find yourself reading a book specifically book entitled Mobile Applications Development with Android: Technologies and Algorithms your head will drift away trough every dimension, wandering in every single aspect that maybe not known for but surely might be your mind friends. Imaging every single word written in a e-book then become one application form conclusion and explanation which maybe you never get ahead of. The Mobile Applications Development with Android: Technologies and Algorithms giving you yet another experience more than blown away your thoughts but also giving you useful details for your better life in this era. So now let us present to you the relaxing pattern at this point is your body and mind is going to be pleased when you are finished looking at it, like winning a sport. Do you want to try this extraordinary investing spare time activity?

Gary Clark:

Are you kind of busy person, only have 10 as well as 15 minute in your day to upgrading your mind proficiency or thinking skill also analytical thinking? Then you have problem with the book when compared with can satisfy your short period of time to read it because this all time you only find publication that need more time to be learn. Mobile Applications Development with Android: Technologies and Algorithms can be your answer as it can be read by anyone who have those short extra time problems.

Robert Victor:

Publication is one of source of information. We can add our understanding from it. Not only for students but also native or citizen want book to know the change information of year to help year. As we know those ebooks have many advantages. Beside most of us add our knowledge, can bring us to around the world. From the book Mobile Applications Development with Android: Technologies and Algorithms we can take more advantage. Don't that you be creative people? To become creative person must like to read a book. Just choose the best book that appropriate with your aim. Don't possibly be doubt to change your life with that book Mobile Applications Development with Android: Technologies and Algorithms. You can more appealing than now.
