Electron Paramagnetic Resonance (EPR) spectroscopy - also sometimes termed Electron Spin Resonance spectroscopy - has manifold potential uses in biochemistry and medicine. The paramount importance of EPR spectroscopy applied to biological tissues and fluids is that it identifies the changes in redox processes that contribute to disease.

EPR spectroscopy has come a long way from its original use to detect malignant tumors. For example, the development and later refinement of methods of low-temperature registration of biological tissues widened the scope of EPR spectroscopy. Innovations made possible by the introduction of spin labels, probes, and traps made EPR spectroscopy ever more applicable to biochemistry and medicine, to the point where *in vivo* studies are being carefully considered.

This comprehensive book discusses spectra of many tissues and bodily fluids, and the quantitative nature of paramagnetic centers in both normal individuals and patients suffering from a variety of diseases. Special attention is given to the EPR examination of bio-molecules, such as enzymes, polypeptides, vitamins, lipids, hydrocarbons, etc., which play an essential role in human activity.

This book will be of great interest to physicians specializing in many different areas. Similarly, biologists, biochemists, biophysicists, and chemists will find this book very useful. It has also been written so that it may be used as a textbook at graduate level.

From reader reviews:

Walter Johnson:

Inside other case, little individuals like to read book Electron Paramagnetic Resonance in Biochemistry and Medicine (Topics in Applied Chemistry). You can choose the best book if you love reading a book. As long as we know about how is important the book Electron Paramagnetic Resonance in Biochemistry and Medicine (Topics in Applied Chemistry). You can add expertise and of course you can around the world by just a book. Absolutely right, due to the fact from book you can know everything! From your country until finally foreign or abroad you will end up known. About simple point until wonderful thing you may know that. In this era, we are able to open a book or maybe searching by internet unit. It is called e-book. You may use it when you feel bored to go to the library. Let's go through.

Michael Bennett:

In this 21st century, people become competitive in each way. By being competitive today, people have do something to make all of them survives, being in the middle of the particular crowded place and notice simply by surrounding. One thing that occasionally many people have underestimated this for a while is reading. That's why, by reading a publication your ability to survive boost then having chance to stand up than other is high. For you who want to start reading any book, we give you this particular Electron Paramagnetic Resonance in Biochemistry and Medicine (Topics in Applied Chemistry) book as nice and daily reading book. Why, because this book is usually more than just a book.

Christian Fowler:

People live in this new morning of lifestyle always make an effort to and must have the free time or they will get lots of stress from both day to day life and work. So , when we ask do people have free time, we will say absolutely without a doubt. People is human not just a robot. Then we ask again, what kind of activity are you experiencing when the spare time coming to a person of course your answer can unlimited right. Then ever try this one, reading publications. It can be your alternative with spending your spare time, the actual book you have read is Electron Paramagnetic Resonance in Biochemistry and Medicine (Topics in Applied Chemistry).

Franklin Crossland:

A lot of guide has printed but it differs. You can get it by online on social media. You can choose the most effective book for you, science, comedian, novel, or whatever by means of searching from it. It is called of book Electron Paramagnetic Resonance in Biochemistry and Medicine (Topics in Applied Chemistry). You'll be able to your knowledge by it. Without making the printed book, it could add your knowledge and make a person happier to read. It is most crucial that, you must aware about guide. It can bring you from one spot to other place.
