Immunopharmacology of the Microcirculation (Handbook of Immunopharmacology)

Immunopharmacology of the Microcirculation (Handbook of Immunopharmacology)

The sum of a range of inflammatory events at the microvascular level leads to the expression of one of many inflammatory diseases. The microcirculation is a target for existing and potential anti-inflammatory therapies and it is anticipated that a greater knowledge of the immunopharmacology of the microcirculation will lead to novel therapeutic targets.

This volume covers examples of these inflammatory diseases, the *in vitro* and *in vivo* techniques used to study them, and the therapeutic agents used to combat them.
