ISO TC 91

ISO 4318:1989, Surface active agents and soaps -- Determination of water content -- Azeotropic distillation method ISO TC 91

The water in a test portion is removed by azeotropic distillation with boiling xylene or petroleum. The volume of the water collected is measured. The method is applicable to products in the form of powders having water contents greater than 5 % (m/m), and in the form of pastes and solutions. It is not applicable to samples containing water-soluble volatile compounds, for example ethanol. This title may contain less than 24 pages of technical content.
