Mathematical Knowledge and the Interplay of Practices

José Ferreirós

Mathematical Knowledge and the Interplay of Practices José Ferreirós

This book presents a new approach to the epistemology of mathematics by viewing mathematics as a human activity whose knowledge is intimately linked with practice. Charting an exciting new direction in the philosophy of mathematics, José Ferreirós uses the crucial idea of a continuum to provide an account of the development of mathematical knowledge that reflects the actual experience of doing math and makes sense of the perceived objectivity of mathematical results.

Describing a historically oriented, agent-based philosophy of mathematics, Ferreirós shows how the mathematical tradition evolved from Euclidean geometry to the real numbers and set-theoretic structures. He argues for the need to take into account a whole web of mathematical and other practices that are learned and linked by agents, and whose interplay acts as a constraint. Ferreirós demonstrates how advanced mathematics, far from being a priori, is based on hypotheses, in contrast to elementary math, which has strong cognitive and practical roots and therefore enjoys certainty.

Offering a wealth of philosophical and historical insights, *Mathematical Knowledge and the Interplay of Practices* challenges us to rethink some of our most basic assumptions about mathematics, its objectivity, and its relationship to culture and science.

From reader reviews:

Victor Elam:

Book is usually written, printed, or descriptive for everything. You can realize everything you want by a reserve. Book has a different type. We all know that that book is important issue to bring us around the world. Adjacent to that you can your reading ability was fluently. A reserve Mathematical Knowledge and the Interplay of Practices will make you to always be smarter. You can feel a lot more confidence if you can know about everything. But some of you think in which open or reading some sort of book make you bored. It's not make you fun. Why they can be thought like that? Have you in search of best book or appropriate book with you?

Robert Densmore:

This Mathematical Knowledge and the Interplay of Practices book is not really ordinary book, you have after that it the world is in your hands. The benefit you have by reading this book is definitely information inside this guide incredible fresh, you will get info which is getting deeper an individual read a lot of information you will get. This particular Mathematical Knowledge and the Interplay of Practices without we comprehend teach the one who looking at it become critical in imagining and analyzing. Don't end up being worry Mathematical Knowledge and the Interplay of Practices can bring whenever you are and not make your bag space or bookshelves' grow to be full because you can have it within your lovely laptop even telephone. This Mathematical Knowledge and the Interplay of Practices having excellent arrangement in word in addition to layout, so you will not sense uninterested in reading.

Miguel Philip:

As we know that book is essential thing to add our information for everything. By a book we can know everything you want. A book is a group of written, printed, illustrated as well as blank sheet. Every year has been exactly added. This e-book Mathematical Knowledge and the Interplay of Practices was filled with regards to science. Spend your free time to add your knowledge about your scientific disciplines competence. Some people has distinct feel when they reading a new book. If you know how big advantage of a book, you can feel enjoy to read a book. In the modern era like today, many ways to get book that you wanted.

Cynthia Cisneros:

Book is one of source of information. We can add our knowledge from it. Not only for students but in addition native or citizen will need book to know the upgrade information of year for you to year. As we know those books have many advantages. Beside we all add our knowledge, may also bring us to around the world. By book Mathematical Knowledge and the Interplay of Practices we can consider more advantage. Don't someone to be creative people? For being creative person must prefer to read a book. Just choose the best book that suitable with your aim. Don't possibly be doubt to change your life at this time book Mathematical Knowledge and the Interplay of Practices. You can more inviting than now.
